

Download instructions for desktop versions of Genworth's Calculators

1. Click on the [Download](#) link.
2. Depending on your browser settings, a download dialog window appears where you can select a destination folder to save the file. You can choose any folder on your computer. After selecting a folder, click on [Save or Ok](#).
Note: If your browser setup is such that files are automatically downloaded to a pre-selected folder, you don't need to perform any action for this step.
3. At this point, depending on your browser settings, you may see a *Download Complete* dialog window. Simply close the window.
*Note: If you're using the Firefox/Netscape browser, simply click on the **X** at the top-right corner of the download dialog window.*
4. Navigate to the folder where you downloaded the file. Double-click on the saved file (named *Genworth_Calculators_EN.zip*). Use any standard zip tool (*Winzip™, PKZip™, WinRAR™, etc...*) to extract the files to any folder on your system.
5. Open up the folder to which you extracted the files in step 4 above. You'll see a [Start.exe](#) file. Double-click the file to begin using the Genworth Calculators.

TIP: For easy access to the calculators, it is highly recommended that you create a shortcut to the Start.exe file. To create a shortcut, simply right-click the file and select [Send To → Desktop \(create shortcut\)](#)
